#### No More Back-Breaking Scuttles To Be Carried Up Those Cellar Stairs

If you buy coal in large quantities you must have room to store it; if in small quantities, it is expensive. When you want to use it you must carry it from its storage place to your range, and of all tasks that is one of the most weary.

When you burn wood or coal you have the heat, dirt, and the trouble of attending to the fire. If you use gas you require no room for storage; no back-breaking scuttles to be carried from the cellar to the kitchen. The fire in the gas range burns steadily and without attention; it is always ready, without dirt or trouble, in large or small quantities.

STAFFORD SPRINGS

Republican Caucus Held Monday Evening—Ticket Nominated by the Democrate.

At the republican caucus held in the borough hall Monday evening the following nominations were made for town officers: Assessor, John M. Larned; board of relief, P. L. Uplant; selectimen, W. R. Freble, Enos E. Fenning, W. R. Fresh, Mortan I. Togularity work to water with the democratic factor in my winning so easily. Continuing, Dr. Sater endit 'M. W. W. W. Smith; three years, R. W.

I consider that plenty of iron in my blood is the secret of my great strength,

A hitherto untold secret of his great victory over Jack Johnson and Frank Moran.

die every year from pneumonia, grippe, consumption, xidney, liver and heart trouble, etc. The real and true cause which started their diseases was nothing more or less than a weakened condition brought on by lack of iron in the blood. Iron is absolutely necessary to enable your blood to change food into living tissue. Without it, no matter how much or what you eat, your food merely passes through you without doing you any good. You don't get the strength out of it and as a consequence you become weak pale and sickly looking, just like a plant trying to grow in a soll deficient of Iron. It you are not strong or well you owe it to yourself to make the following test: See how long you can work or how far you can walk without becoming thred. Next take two five grain tablets of ordinary nuxated Iron three times per day after meals for two weeks. Then test your strength again and see for yourself how much you have gained. I have seen dozens of nervous, rundown people who were alling all the while, double their strength and ondurance and entirely get rid of all symptoms of dyspepsia, liver and other troubles in from ten to fourteen days' time simply by taking iron in the proper form. And this after they had in some cases been decrening for months without obtaining any benefit. But don't take the old forms of reduced iron, iron acctate or tincture of Iron simply to save a few cents. You must take iron in a form that can be easily absorbed and assimilated like nuxated iron if you wish it to do you any good, otherwise it may prove worse than useless.

Many an athlete or prize fighter has won the day simply because be knew the secret of great strength and endurance and filled his blood with iron before he went into the affray, while many another has gone to inglorious defeat simply for the lack of iron.—E. Sauer, M. D.
